Spring practice week is an opportunity for senior managers and practitioners to spend time together carrying out day to day work to see the difference it is making for children, young people and families.

Partners from other council departments and agencies are invited to join in observing multi agency practice and sharing practice events that can be observed to support a better understanding of each other’s work.

Managers will talk to families and colleagues to hear how we are measuring up to our Outstanding Practice Framework and how they are experiencing our new practice model.

We know from previous practice weeks that it is a positive opportunity to learn together and works really well when everyone joins in.

So please look out for Practice Week news that will be coming out each week leading up to the 30th March and get involved.
